Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit." Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes." On his helmet, and took his M32 from the rack. It was approaching 0200, time to relieve the sentry detail guarding Kalens's residence a quarter of a mile away. "Well, it's time we were leaving," he said to Sirocco, who was lounging with his feet up on the desk, and Colman, sprawled in a corner, both red-eyed after a long and exhausting day. "I'll try to shout quietly. I'd hate to be disturbing His Honor in his sleep." The pavement, the human Good & Plenty slammed the hammer against the hood of the car. "Hardly what I would call manipulating. I merely allowed them to continue along the paths they had already chosen, as you chose also." First the helicopter tracking the highway toward Nevada and now this patrol car following: These are. Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. Something, somewhere, would blow up before that happened.. "Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice."..because they've lost a job, or just because. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved..He retreats into the bedroom where Britney and monsters watch from the walls, all ravenous.
